

Infodex Plus is a Destron Fearing program used to manage the DTR4 reader including:

- Enable/disable/erase memory
- Download tag data from a DTR4
- Export tag data to various software data bases
- Bluetooth configuration

Requirements of Infodex Plus

- Windows XP, Vista, Win 7 (32 or 64 bit systems)
- Microsoft .NET Framework 4.0 or later (this update is included with product CD)
- Bluetooth connectivity or an RS – 232 Serial communication port

Installing Infodex Plus

- From this web site, unzip the Infodex Plus folder and run “**setup.exe**”. This will install .NET 4.0 if your pc needs it
- From the product CD The auto run function will start the program installation process.
- If the installation does not start, open the disk and run”**setup.exe**” This will install .NET 4.0 if your pc needs it.

* Microsoft .NET Framework 4.0 is included on this cd*

Please refer to the DTR4 manual for further information
