Identify. Profit. ™

In 1945 Destron Fearing™ created the country's first commercially marketed visual identification tags for livestock. This is the foundation of today's animal identification solutions for producers worldwide.

Destron Fearing™ continues its tradition of leadership by manufacturing a range of innovative visual and electronic identification products, helping livestock producers reliably identify their animals and better manage their operations.

Panel Tags

Rugged, lightweight and available in a variety of fade-resistant colors, Destron Fearing™ panel tags are designed for superior retention, all weather performance and easy application when used with the ProGripII™ Universal Tag Applicator.

Custom Tags

Custom marking is available including Logos, Lines of Text and Reverse side marking. Customized brands and images can be produced with a provided image.

Premium Performance RFID

Our e.Tags® are designed to provide optimal read range and superior cold weather application. Each contains a passive, ISO-compliant (134.2 kHz) RFID transponder encoded with a 15-digit identification number that can be read in milliseconds by any Destron Fearing™ or ISO-compliant reader.

Dark & Durable Marking

Dark & Durable™ tag marking begins with the Destron Fearing laser mark that is etched into the tag surface using a computer guided laser beam resulting in a dark gray mark. The laser mark is then overlaid with black ink resulting in bold, black numbers.
