

PRODUCTION CYCLE

Destron Fearing™ FOR SWINE IDENTIFICATION TAGS

USAGE CHART BASED ON SIZE / AGE:

Birth Weaning Feeder Breeding Age+

LITTER MAX^{2™}

STANDARD ROUND

HOG MAX®

LITTER MAX^{2TM}

1.25" L x 1.25" W (3.2cm X 3.2cm)

- Litter Max^{2™} is the industry leader for use in genetic management programs
- Designed specifically for piglets from birth to approximately 40 lbs
- Non-metal tip
- Square male and female design provide maximum retention from birth to harvest
- Square panel enhances readability and printing options for complex barcodes and logos

STANDARD ROUND

1.1" diameter (2.8cm)

- Standard Round stud is most commonly used with feeder age pigs
- Universal size is designed for use in swine of any age
- Metal tip
- Round shape and fast taper tip provide superior piercing ability

HOG MAX®

1.5"L x 2.1" W (3.8cm x 5.3cm)

- Hog Max is the industry leader for breeding age swine
- Center post stud design maximizes the rate of retention
- Longer tapered tip for superior piercing ability
- Rectangular panel enhances readability and printing options for complex barcodes and logos
- Can accommodate multiple lines of custom printing and designs including barcodes and logos
